

REMARKS

According to the January 6, 2010 Office Communication (page 3) to which Applicants' July 6, 2010 Amendment Under 37 C.F.R. §1.115 was responsive:

. . . Figures 6 and 8-13 contain nucleic acid sequences that are greater than ten nucleotides in length, but have not been identified by the appropriate sequence identifier either in the drawing figure or in the "Brief Description of the Drawings" section (see MPEP 2422.02). Also, pages 16, 17, 31-35, and 37-42 contain nucleic acid sequences that are greater than ten nucleotides in length, but have not been identified by the appropriate sequence identifier.

As noted in their July 6, 2010 Amendment (page 12):

. . . Applicants' attorney is attending to this matter and has referred it to their patent draftsmen for appropriate amendments and correction. As soon as the papers amending and correcting the sequence identifiers in the specification have been completed, they will be submitted in a supplemental paper to this Amendment.

Having received the documents from their patent draftsmen, Applicants are making the accompanying submission to address the above objection to the specification.

If a telephone conversation would further the prosecution of the present application, Applicants' undersigned attorney request that he be contacted at the number provided below.

Early and favorable action is respectfully requested.

Respectfully submitted,

Ronald C. Fedus
